

## **The Leading Marine Technical Company**

member of BROOKHAVEN ENTERPRISES™

*The Power of  
Our Experienced People*

**REPAIR TEAMS**

## I. Introduction

Royal Intel is one of the Romanian leading independent marine technical company offering services from upgrading and repairing all ship types. With an experience of more than 16 years, Royal Intel, has an excellent record in upgrading, conversions and general repairs of ships, carried out in Greece, Romania and in other major world ports. The teams ensure that all projects, from their conception to their conclusion, are carried out with High Standard and Cost Effectiveness in mind, but also in accordance with tightly controlled, and pre-arranged Time Schedules.

Gemenetzidis Chris, MD, B.Eng. on Mechanical Naval Engineering,

*"We never deploy a technician, even assistants, unless proper training, briefing and testing, where possible, has being effected. Thus we provide service guarantee for all our teams, that will perform up to full satisfaction of our clients. Therefore we invested a great amount of money to our testing facility including X-ray film apparatus for IACS certified welders, Argon, Aluminum, Inox electric welding and CO2 apparatus."*

## II. Repair Team Aspects

**Royal Intel is company specialized in deploying teams for ship repairs and technical service worldwide.**

With experienced and dedicated engineers and workers, it has established itself as a respected and reliable company with a proven ability to undertake any type of work and the most challenging projects.

Our clients can depend on its support in any waters they operate. With our mobile crews Royal Intel can be considered as your trusted international partner.

Highly qualified and vastly experienced marine engineers, naval architects, electrical engineers and architects undertake a range of consultancy projects varying from simple designs and inspections of all types to conceptual designs and project management.

***Our Business is to provide a Top Class Service, and our Strength is Our People.***

### III. Area of Expertise of our people

Royal Intel Ltd has been providing the maritime community with high standard services with regards to repairs of main and auxiliary engines, stabilizing systems, hull and piping, passenger and crew accommodation refitting, as well as outfitting, blasting and painting on all types of ship, e.g. cruise liners, passenger ro-ro ships, general cargo ships, product carriers, LNG tankers etc.

Royal Intel Ltd fuses the best in upgrading into creating a united work force to serve and satisfy its most demanding clientele. We hope that within the near future we will have the opportunity to demonstrate our exemplary work to you and to undertake your most difficult requests.
